

# 2022 Tokushima Bioscience Retreat

## Call for papers:

This retreat is to provide a venue for the graduate students, faculty members, and researchers at Tokushima University to get together and interact with each other across the boundaries of research fields and affiliations. Participants give research presentations followed by question-and-answer sessions **in English**. Excellent presentations will be awarded the Young Researcher Award and the Special Award (with extra prizes). The retreat will be **online** including a social hour. At the online venue, we have a plan to use a social network space in *Gather* for self-introduction posters where participants can organize the content as they wish. We hope that this makes the social hour more interesting and fun for all. We look forward to the participation of many graduate students in this event!
